

Leading way for business to go green

By BELINDA BERRY

GOODNA mechanical engineering company Leslie Consulting has won state-wide recognition as a Climate Smart business cluster leader.

The Queensland Department of Environment and Natural Resources recently awarded Leslie Consulting the role.

The department will appoint 20 ClimateSmart business leaders to establish strategic business clusters throughout the state.

Each cluster will involve about 20 companies working to devise cost-effective environmental savings.

Leslie Consulting will have to increase awareness of the benefits of being climate smart and achieve quantitative reductions in energy use, water use, waste output and greenhouse gas emissions in the local business community.

The company's energy manager Adrian Horin said they would provide information to businesses to help

them reduce their environmental impact.

"We'll assist with benchmarking current usage and output, conducting network events and workshops and will be performing walk through audits with the participant," Mr Horin said.

■ Any business interested in taking part should phone Mr Horin on 3436 2500.
